

LEARN WATER FROM THE EXPERTS

SUMMER PROGRAM JULY 7-18, 2008

PROJECT WET WORKSHOPS INCLUDED

The internship program is an intensive two-week course that introduces middle school and high school teachers to the water management issues facing the community and provides opportunities to interact with the utility in an education setting. The internship is designed to provide teachers from all curriculum areas with relevant information. Graduates will develop water related projects in their classrooms in the 2008-2009 school year.

INTERNS WILL RECEIVE:

- ◆ Up to \$750 dollars for the completion of the two-week internship and follow-up
- ◆ The potential for professional development credit
- ◆ Excellent resources/information to bring to their students
- ◆ Continued access to Tucson Water experts following the internship
- ◆ Project WET Workshop Handbooks

According to one teacher internship graduate, "I got a better understanding of the difficulties they confront every day, trying to balance the requirements and demands of the public, developers, politicians and various governmental agencies."

"The process is beneficial not only to the teachers involved", says Tucson Water Director David Modeer, "but also to the large number of Tucson Water staff who are involved through presentations, demonstrations, and by providing job shadowing experiences."

Please submit your application before June 1, 2008. Early registration will be given priority. Completed applications may be submitted by fax at (520) 791-5041 or by mail to:
